

# Claude Code Sync Workflow

Keep Web Claude & Mac Claude Code in sync

---

## 1 Before Asking Web Claude to Work

Step	Tell Claude Code on Mac
1	"Commit all my changes"
2	"Push to claude/work-on-project-5L6Vd"

## 2 After Web Claude Is Done

Step	Tell Claude Code on Mac
1	"Pull from claude/work-on-project-5L6Vd"

## 3 After Mac Claude Code Is Done, Before Coming Back to Web

Step	Tell Claude Code on Mac
1	"Commit all my changes"
2	"Push to claude/work-on-project-5L6Vd"

## 4 If Something Goes Wrong

Problem	Tell Claude Code on Mac
Check branch	"What branch am I on?"
Switch branch	"Switch to claude/work-on-project-5L6Vd"
Check conflicts	"Do I have any merge conflicts?"
Fix conflicts	"Resolve the merge conflicts"
See changes	"Show me what changed since my last commit"

## ! The Golden Rule

**Push -> Tell me -> I work -> I push -> Pull -> Work locally -> Push -> ...**

*Just talk to Claude Code like you talk to me - it handles the git commands.*
